Digifli Digital Bulletin Boards

Background: Digifli started in Alameda, CA in 2017 as a Community Bulletin Board for local businesses and nonprofits.

In 2023 Stanford University approached Digifli about customizing the system for the d.school campus.

We worked with Stanford and created a private network to reduce costs, streamline communication, and enhance engagement.

Stanford
University

“Our partnership with Digifli has not just met but exceeded our expectations, helping us build a more connected and responsive campus environment.”

- **Milan Drake**
Community Design Lead - Stanford

Go Digital with Digifli

- Reduce e-waste and printing cost.
- Increase awareness and engagement.

Aligns with CA Senate Bill (SB) 1383 to reduce paper consumption and waste.

Digifli vs. Traditional Digital Signage

No complex software or apps. As simple as posting a photo on social media.
No schedules, timelines, templates, or design software to learn.

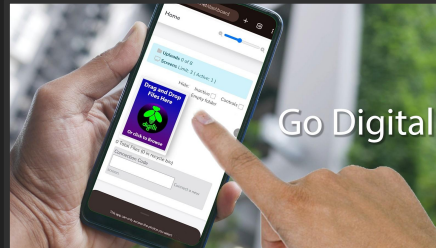

Digifli is best for people who:

- Manage dozens of existing postings.
- Already have the flyers created.
- Need a simple fast publishing solution.
- Need automatic removal of past events.

Digifli is NOT ideal for people who:

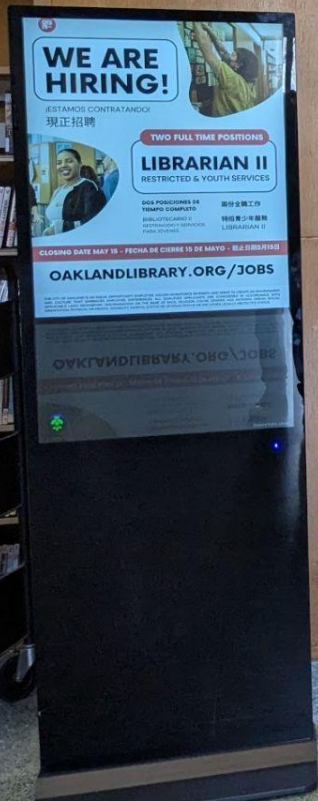

- Need templates and design features.
- Only have one or two posts at a time.
- Need a menu board.
- Want to post videos or manage rotation schedules.

If you have 10 flyers on your desk or in your phone, drag them into Digifli and they are instantly in rotation on all your screens.

43" Elite Kiosk and 26" Countertop models

Welcome to the Oakland Public Library
Bienvenido a la Biblioteca Pública de Oakland 歡迎光臨 奧克蘭(奧克蘭)公立圖書館 Chào Mừng Đến Với Thư Viện Công Cộng Oakland
